ACRM Annual Conference
PROGRESS IN REHABILITATION RESEARCH

IN-PERSON

ACRM CHICAGO
8-11 NOV 2022
HILTON
PRE-CON: 6-8 NOV

INTERDISCIPLINARY
The **ACRM Annual Conference: Progress in Rehabilitation Research** is the premier educational conference for evidence-based learning in rehabilitation medicine. The 2022 ACRM Program Committee invites proposals focused on research evidence and its translation into clinical practice.

**ACRM is especially interested in the following content topics:**

- Aging Research & Geriatric Rehabilitation
- Arts and Neuroscience
- Athlete Development & Sports Rehabilitation
- Behavioral Health Sciences
- Brain Injury
- **Burn Rehabilitation**
- Cancer Rehabilitation
- **Cardiopulmonary Rehabilitation**
- **Caregiver Needs**
- Clinical Practice (assessment, diagnosis, treatment, knowledge translation/EBP, implementation science, program development)
- Complementary Integrative Rehabilitation Medicine
- COVID-19
- **Cultural Competency**
- **Diversity, Equity & Inclusion**
- **Early Mobilization & Rehabilitation in the Intensive Care Unit**
- Ethics
- Health Services Research
- International
- **Leadership**
- Lifestyle Medicine
- Limb Care
- Measurement
- Military/Veterans Affairs
- Neurodegenerative Diseases
- Neuroplasticity
- Pain
- Pediatric Rehabilitation
- Rehabilitation Treatment Specification System
- **Skin Management**
- Spinal Cord Injury
- Stroke
- Technology (e.g., robotics, assistive technology, mHealth)
- **Trauma**
- **Writing Grant & Getting Funded**

**Sample topic areas of interest to conference participants include:**

- Evidence-based approaches to diagnosis, treatment, and overall care of individuals with acquired brain injury, spinal cord injury, stroke, neurodegenerative diseases, pain, and cancer
- Applications of technology in rehabilitation research and practice (prosthetics, orthotics, assistive technology, implantable devices, robotic devices)
- Evidence-based approaches for remediation of cognitive impairment, depression, post-traumatic stress disorder, sleep disturbances, and pain
- Role of exercise and “activity-based” therapy in neuro-recovery
- Use of innovative information and communications technology in rehabilitation (tele-health, tele-rehabilitation, Internet and social media)
- Use of neuro-imaging in diagnosis and treatment
- Methods for translation of evidence into clinical practice
- Alternatives to randomized clinical trials (RCTs) for validating treatment effectiveness and application of RCT findings into clinical practice
- Application of biomechanics, motor control, and learning perspectives in rehabilitation.

Please see for the full guidelines and worksheets at [ACRM.org/call](http://ACRM.org/call)
PRESENTATION TYPES

1) PRE-CONFERENCE INSTRUCTIONAL COURSES

Instructional courses may be proposed for a four-hour or eight-hour time block, allowing presenters the opportunity to discuss and present a topic in depth. Courses should be either instructional in nature, offering in-depth training or knowledge translation on a particular topic; or informative, providing detailed coverage of an area of research, methodology, or clinical practice. Courses will be scheduled as pre-conference sessions on 6, 7, or 8 November 2022 depending upon the length and level of interest in the topic. Instructional courses provide the opportunity for small-group interaction and hands-on activities.

The proposal should include a course title, course director/lead presenter, all presenters with credentials and affiliations, detailed course outline, and duration. The submission must describe the instructional method to be used, and the content and format of presentations. It should also identify the intended audience (i.e., researchers, clinicians, administrators). A concise and descriptive summary of the course is also required for marketing purposes.

There must be multiple presenters identified. All presenters must furnish necessary disclosure information concerning potential conflicts of interest and must agree to have the course audio or video-recorded for future re-broadcast. Presenters will not be paid a stipend or honorarium. All presentations must be submitted for review prior to the conference.

Selection Criteria

Each complete submission received by the published due date will be independently peer-reviewed. Each proposal is peer-reviewed for the following elements:
1) scientific, clinical, or didactic quality;
2) interdisciplinary nature;
3) broad appeal to the ACRM membership;
4) timeliness of the topic;
5) and contribution to the state-of-the-art of rehabilitation science.

The conference Program Committee reserves the right to offer alternative or reduced time slots for presentations based on submissions. Acceptance/decline notifications are due to Instructional Course submitters by mid-March.

2) SYMPOSIA Proposals Due: see ACRM.org/call

Symposia are 75 minutes in length, presented by professionals with expertise in the topic. Symposia will be scheduled for presentation 8 - 11 November 2022. Desired symposia submissions:

- Show how current research can effectively guide clinical practice.
- Identify clinical questions where additional research data are needed.
- State a direct relationship between the subject matter and evidence-based practice.

The following components are encouraged: interdisciplinary content, presenters from multiple institutions, international presenters, and a point/counterpoint format, as appropriate, for the discussion period.

There must be more than one presenter identified. All presenters must furnish necessary disclosure information concerning potential conflicts of interest and must agree to have the course audio or video-recorded for future re-broadcast. Presenters will not be paid a stipend or honorarium. All presentations must be submitted for review prior to the conference.

Selection Criteria

Each complete submission received by the published due date will be independently peer-reviewed. Each proposal is peer-reviewed for the following elements:
1) scientific, clinical, or didactic quality;
2) interdisciplinary nature;
3) broad appeal to the ACRM membership;
4) timeliness of the topic;
5) and contribution to the state-of-the-art of rehabilitation science.

The conference Program Committee reserves the right to offer alternative or reduced time slots for presentations based on submissions.

3) SCIENTIFIC PAPERS & POSTERS

Proposals Due: see ACRM.org/call

A scientific paper is a moderated oral presentation of 17 minutes including questions and discussion. Outstanding submissions may be chosen for a longer presentation. AV equipment may be used to supplement the presentation.

Posters are graphic presentations of a scientific paper. Submissions must include objectives, hypotheses, methodology, and results in the abstract (see Submission Guidelines below). Submissions with pending results are not accepted.

Submission Guidelines

A 275-word abstract must follow one of the two structured abstract formats required for submission of general articles to the Archives of Physical Medicine and Rehabilitation. See the Instructions for Structured Abstracts available at ACRM.org/call.

Structured abstracts for Scientific Poster and Papers must have these sections:
- Research Objective(s)
- Design
- Setting
- Participants (animals or cadavers or specimens, for orthotics only)
- Interventions
- Main Outcome Measure(s)
- Results
- Conclusions
- Author(s) Disclosures

continued...
If you do, too, please join us.

As a presenter, as a member and in Chicago for #ACRM2022

4) LAUNCHPAD Proposals Due: see ACRM.org/call

Developed by the ACRM Technology Networking Group, LaunchPad is a rehabilitation technology innovation competition for early-stage health technology companies and rehabilitation research labs/researchers working on technology-based solutions. This is an exciting opportunity to pitch a company or idea to a panel of experts and an audience of clinicians, researchers, engineers, and decision-makers and receive market feedback. For details and application guidelines: ACRM.org/LaunchPad.

“LaunchPad offers a unique opportunity for startups and R&D labs to receive feedback on their rehabilitation technology solutions directly from experts with deep knowledge of health technology R&D, rehabilitation services and technology acquisition” —Tracey Wallace, CCC-SLP, Chair of the LaunchPad Task Force
